BIG

Have you ever been dealt a 20 and the dealer got 21?

Bad Beat Blackjack Progressive is an exciting new side bet that pays you anytime the Dealer beats your 20 with a 21. The side bet takes the most agonizing part of blackjack and turns it into a winning situation for the Player. With payouts ranging from 5 for 1 to our growing Bad Beat jackpot, it has never been easier to "Get Beat and Get Paid!"

How to Play

Bad Beat Blackjack featuring the G3 Progressive is an optional side wager for blackjack. The side bet pays if the player gets a 20 and is beaten by a dealer 21. The more cards it takes for the dealer to reach 21, the higher the payout. A Seven Card Dealer 21 pays the progressive jackpot.

For the players to participate in the side bet, they must first purchase credits from the dealer. Once the players have the credits and made a standard blackjack bet, they may wager between 1 and 5 credits on the Bad Beat Blackjack.

DEQ's innovation and ingenuity has been to replace the single dollar coin slots and coin sensors with its internationally award winning G3™. The G3 has been hailed as a more reliable and profitable technology that has no betting cap. The G3 technology incorporates multiple credit betting, dealer hand betting and mystery bonusing. These important accretive revenue driving features will generate more revenue for your casino than the \$1 chip legacy technology ever could.

Mystery Prize Bonusing

High hit frequency prizes are the key to keeping players at the table. By awarding them with small prizes at an accelerated rate (this improved pay table will award one prize every twenty hands or so) their perception of winning will stay high thus encouraging longer play. The G3 offers such a prize called the **Lucky Player™**. This randomly drawn prize is sure to be a crowd pleaser:

LUCKY PLAYER MYSTERY PRIZE

If the Lucky Player prize appears on the table display and you are seated at the randomly selected player position and you have placed a Player's hand side wager, you WIN!
